EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Francesco Sardone on 3/22/2010.

The application has been amended as follows:

Claims 30-36 are canceled.

This Notice of Allowance is responsive to Applicant's Amendments filed on 2/11/2010. The Amendments and Arguments, pages 6-15, filed therein have overcome the rejections of claims 16, 23 under 35 USC 102(b) by Kuhns and Stein mailed on 11/17/2010. Therefore, the rejections of the claims have been withdrawn.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Claim 16 has not been rejected using prior art because no references, or reasonable combination thereof, could be found which disclose or suggest *a delivery device for delivering surgical anchors comprising: a plurality of surgical anchors located within a delivery tube and radially about an anchor carrier, each surgical anchor having a penetration section and a head section, an actuator having at least two states, the first state causing the anchor carrier to be in its proximal-most position and the second state causing the anchor carrier to be in the distal-most position with a perimeter of*

the penetration section of the surgical anchor extending distally beyond the distal end of the delivery tube and being in contact with a target site; wherein the reciprocating anchor carrier with distal and proximal positions, wherein the distal end of the anchor carrier terminates in a tissue penetrator member, and wherein the reciprocating anchor carrier is moveable and proximally with respect to the delivery device, in combination with the rest of the claimed limitations as set forth in claim 16.

As to claim 23, the prior art does not teach the invention including *two reactions members fixed in respect to a delivery tube, each of the at least two reactions members extend radially inward and distally from the inner surface of the delivery tube; wherein a reciprocating anchor carrier with distal and proximal positions, wherein the distal end of the anchor carrier terminates in a tissue penetrator member, and wherein the reciprocating anchor carrier is moveable and proximally with respect to the delivery device, in combination with the rest of the claimed limitations as set forth in claim 23.*

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
